Tilak Maharashtra Vidyapeeth, Pune.

ABSTRACT:

Advancement of technology has greatly affected the formats of the information, needs and information seeking behavior of users. The college library need to develop balanced library collection (print and non-print) to satisfy the needs of user of 21st century and achieve the objective of the parent organization. There is an urgent need for re-engineering the collection development process to manage information growth within limited budget and in achieving the academic excellence of the institution. This study was undertaken in order to find out the status of the library collection, and collection development process adopted in the Arts, Science and Commerce college libraries in Mumbai region. The research is based on the survey method using questionnaire method. Based on findings suggestions are given to college libraries for development of

balanced collection and re-engineering of collection development process keeping into account the written policy, acquisition and selection process, technical process, physical verification and weeding out process.

KEYWORDS : Re-engineering, Collection Development, College Libraries.

1. INTRODUCTION

The college library is the heart of the institution. It plays a major role in achieving the academic excellence of the institution and personality development of the youth. The effective collection development is the core function of the college library in satisfying the needs of the user and achieving the objectives of the parent organization. Technological advancement has a definite impact on cost and forms of library collection and information seeking behavior of the users. At the same time today's user are of opinion that everything is available on internet, which has created threat on survival of the college libraries. To face such challenges there is need to re-engineer the collection development of the college libraries.

2. DEFINITION OF TERMS

It is imperative that the following terms are defined, with regard to this research study.

RE-ENGINEERING

Petrozoo and Stepper (1998), has defined the term as "Re-engineering is the concurrent redesign of processes, organizations, and their supporting information systems to achieve a radical improvement in time, cost, quality, and customers' regard for the company's products and services".

With respect to library, Re-engineering designates parting away with the old system and generating a new one with fresh innovative ideas and procedures.

3. REVIEW OF LITERATURE

According to Dahibhateet. al.(2009), information explosion, rising prices of information, changing users' need, limited budgets, educational reforms, more emphasis on research are some of the

THE IMPACT OF ACCREDITATION ON ENGINEERING COLLEGE LIBRARIES IN MUMBAI WITH REGARD TO INFRASTRUCTURE

Dr. Vinay Patil

Librarian, A.D.P.M's Women's College of Arts,
Commerce & Home Science, Near Khajamiya, Jalgaon 425001

Dr. Janice Fernandes

Librarian, Roehampton Library, 2 Danebury Avenue,
London SW15 4HD, United Kingdom

ABSTRACT

Higher education in India today has grown and multiplied at an amazing pace. This demand coupled with an alarming expansion creates a number of challenges for the regulatory bodies in the context of maintaining and enhancing quality. Accreditation is one of the measures of Quality Assurance designed to assess the quality of an educational institution. Engineering institutions are regulated by the AICTE and their accreditation is undertaken by the National Board of Accreditation (NBA). The quality of an engineering institution as a whole is dependent on the quality of its various components including the library. This study was undertaken in order to find out the impact of Accreditation on engineering college libraries in Mumbai with regard to infrastructure. The research methodology included questionnaire, interview and observation. Various suggestions have been proposed by the researcher on the basis of the above findings. It has been suggested that the management of the engineering college as well as the regulatory and governing bodies take into account the importance and impact of Accreditation to the engineering library. Finally the librarian should consider the positive impact of Accreditation and recognize that both the library as well as the users will benefit from this exercise.

Key words: Accreditation, Impact of Accreditation, Influence of Accreditation, Libraries, Academic Libraries, Engineering College Libraries.

RIGHT TO INFORMATION AND INFORMATION LITERACY

Dr. Vinay Bhaskar Patil

Librarian, A.D.P.M's Women's College of Arts, Commerce & Home Science
Near Khajamiya, Jalgaon

ABSTRACT:-

Right to information act 2005 gives more power to the people to get information from the government. The act gives time limit to get reply from the public information officer, if they are not fulfilled their duty then they have to pay for the same. Secondly if there is any contradiction on the information they provided, they can appeal under this act. Thirdly the person working as a public information officer, he is misuse the power or incapable of performing the duty he may be removed from the post. The information literacy helps to retrieve the information from the source. Now the government follows the e-governance, all the documents are in the electronic format. The people need to know how to get information from the source. The information literacy helps for the same.

KEYWORDS: Right to Information, Information Literacy, Freedom of Information Act, Secret of information Act.

1. INTRODUCTION :

The Right to information Act 2005 gives more power to the people to get information from the government. The Right to information act is development of freedom of information act 2002. There are two commissions, one is at the central level and other one is in the state level. If the central government wants to amend the act, they can amend the act through parliament. The literacy skill is the life for the public in the information age. Due to information explosion, it is very difficult to get relevant information from the information sources. The information literate people know how to find, evaluate and use information effectively to solve their problem.

2. HISTORY OF RIGHT TO INFORMATION ACT:

The Freedom of information act was enacted in the year 2002. The Freedom of information act not fulfilled what was the expectation of that act. The central government appointed advisory council to give suggestion. The National Advisory council suggested the government to make certain changes in the Freedom of Information act. After examining the advisory council recommendation, the government decided to repeal the Freedom of Information act 2002 and also fulfill the article 19 under Indian constitution for right to information. The new act Right to Information 2005 was passed based on the recommendation of the National advisory council.
